BENEFITS OF HONEY AND USES

WHAT IS RAW HONEY?

Collected straight from the beehive, **raw honey is a pure, unfiltered, unpasteurized and unprocessed sweetener made by bees from the nectar of flowers.** Unlike processed honey, **raw honey does not get robbed of its incredible nutritional value and health powers.**

Raw unfiltered honey **health benefits include high level of live enzymes, higher energy level, better digestion, and high antioxidant level.** Unpasteurized raw honey will usually granulate and crystallize to a thick consistency after a few months. It is usually preferred as a spread on bread and waffles, or dissolved in hot coffee or tea.

Raw honey contains natural sugars (80 percent), water (18 percent), and minerals, vitamins, pollen and protein (2 percent). It's not surprising that honey has been called "the perfect running fuel." It provides an easily absorbed supply of energy, making it ideal for energetic morning starts and as a pre and post-exercise energy source.

Feeling a little under the weather with cold and cough...**Honey is a time-honored remedy for a sore throat.** It also relieves coughs more effectively than **over-the-counter medicines that contain dextromethorphan (DM), a cough suppressant.**

You can create your own **remedy at home by mixing up to 2 teaspoons of honey with herbal tea or warm water and lemon.** The honey does the soothing, while the lemon juice can help with congestion.

CONVERSION GUIDE

Sugar	Honey
¼ cup	= 3 tbsp
⅓ cup	= 3 tbsp
½ cup	= ⅓ cup
1 cup	= ¾ cup
2 cups	= 1½ cups

BENEFITS OF BEESWAX AND USES

Beeswax has been around for as long as the honey bee. It is produced by honey bees to build the honeycomb walls. **This natural wax has been used for many things over the years including, but not limited to, cosmetics, skin care products and candles.** There are several benefits associated with the different uses of beeswax.

BURNING BEESWAX CANDLES

When beeswax is burned, it emits negative ions in the air. **These negative ions help rid the air of pollen, dust, mold, toxins and many other pollutants. This feature makes beeswax candles ideal for allergy sufferers.** It has been scientifically proven that the only fuel known to mankind to produce a fully balanced negative ion is pure, unadulterated beeswax.

SMOKELESS CANDLES

Another plus is that **beeswax candles do not produce smoke when they burn.** They also burn much slower than other candles, making them much more cost efficient.

TOP BEESWAX BENEFITS & USES

Skin Enhancer

Beeswax inhibits the growth of bacteria, which can prevent and treat skin conditions like dermatitis, psoriasis and eczema.

Skin Moisturizer

It helps protect and repair rough, dry or chapped skin because it has the ability to lock in moisture.

Liver Protector

Beeswax helps normalize liver function and improve symptoms of fatty liver disease.

Cholesterol Stabilizer

Its compounds lower bad cholesterol and raise good cholesterol.

Pain Reliever & Anti-Inflammatory

Its anti-swelling effects help reduce inflammation and relieve pain.

Acne Treatment

It has strong antiseptic, healing and anti-inflammatory properties making it effective in the treatment of acne.

Lip Healer

The natural moisturizers in beeswax make it the perfect lip balm to heal dry, cracked lips.

Stretch Mark Eliminator

The vitamin A in beeswax helps produce collagen, which fights stretch marks.

Jock Itch & Fungal Skin Infection Reliever

It helps reduce inflammation, pain and itching associated with fungal infections.

Relaxer

Beeswax candles are great aromatherapy agents.
